

Chapter 4: We the Travellers - II

Worksheet 4: We the Travellers - II

Learning Objective: Read simple timetables, calculate the duration of journeys, and solve problems involving time, distance and speed in travel contexts.

Worked Example:

A train leaves Delhi at 6:15 am and reaches Agra at 8:45 am. How long is the journey?

Solution: $8:45 - 6:15 = 2 \text{ hours } 30 \text{ minutes.}$

Questions (1–20)

1. Write 1 hour 45 minutes in minutes only.
2. How many minutes are there between 4:20 pm and 5:00 pm?
3. A bus departs at 10:10 am and the journey takes 50 minutes. At what time does it arrive?
4. Convert 150 minutes into hours and minutes.
5. A flight departs at 14:00 in the 24-hour format. What is this in 12-hour format?
6. A train covers 60 km in 1 hour. How far will it travel in 3 hours at the same speed?

-
7. Bus A leaves at 9:00 am and arrives 11:15 am; Bus B leaves at 9:30 am and arrives 11:20 am. Which bus takes a shorter time, and by how much?

 8. A car travels 240 km in 4 hours. What is its average speed per hour?

 9. A cyclist starts a race at 7:05 am and finishes at 7:42 am. How long did the race take?

 10. A journey starts at 3:40 pm and takes 2 hours 20 minutes. At what time does it end?

 11. A train timetable shows: Mumbai (dep 06:00) – Pune (arr 09:30, dep 09:45) – Satara (arr 12:15). How long is the halt at Pune, and what is the total travel time from Mumbai to Satara?

 12. A flight covers 1,500 km in 2.5 hours. Find its speed in km per hour.

-
13. Friend A cycles 5 km in 30 minutes; Friend B cycles 8 km in 40 minutes. Who cycles faster?
14. A school bus starts picking up children at 7:15 am, and the trip lasts 35 minutes. At what time does it reach school?
15. Sunita's train was scheduled to arrive at 5:00 pm but was delayed by 1 hour 25 minutes. What is the new arrival time?
16. A train travels from City A to City B (300 km) at 60 km/h, halts for 20 minutes, then continues to City C (180 km) at 90 km/h. Find the total time for the entire journey.
17. Three buses leave at 8:00 am. Bus 1 takes 2h, Bus 2 takes 2h 45min, Bus 3 takes 1h 50min. Arrange the buses in order of which arrives first.
18. A car's speed increases from 40 km/h to 60 km/h. How much extra distance can it cover in 2 hours at the new speed compared to the old speed?

19. Plan a train journey to a city you would like to visit. Choose a departure and arrival time, and calculate the total travel duration.
20. Your family travels 150 km by car at 50 km/h to a relative's house. How long will the journey take? If you start at 6:00 am, at what time will you arrive?

Reflection Question: Think about the last long journey (train, bus or car) your family took. Roughly how long did it take? Write what you remember about the timings.

Real-Life Application Question: Find the departure and arrival time of any bus or train route near your home (ask a family member or check a timetable) and calculate the journey duration.
