

Chapter 6: The Dairy Farm

Worksheet 6: The Dairy Farm

Learning Objective: Measure and compare capacity of liquids using millilitres and litres; add, subtract and multiply capacities in farm-related real-life contexts.

Worked Example:

A milkman has 18 l of milk. He sells 12 l 500 ml to a shop. How much milk is left?

Solution: 18 l = 18,000 ml. Sold = 12,500 ml. Left = $18,000 - 12,500 = 5,500$ ml = 5 l 500 ml.

Questions (1–20)

1. How many millilitres make 1 litre?
2. Convert 2 l 500 ml into ml only.
3. Convert 3,750 ml into litres and ml.
4. Which holds more: a 1 litre bottle or a 750 ml bottle?
5. Write 4 litres in millilitres.
6. A cow gives 8 l 250 ml of milk in the morning and 6 l 750 ml in the evening. Find the total milk given in a day.

-
7. A milk can holds 20 l. If 14 l 600 ml is poured out, how much milk remains?

 8. A dairy sells milk in packets of 500 ml each. How many packets can be filled from 15 litres of milk?

 9. One cow produces 9 litres of milk per day. How much milk will 5 such cows produce in a day?

 10. A farmer has 3 cans of milk: 12 l, 15 l 250 ml, and 9 l 500 ml. Find the total milk.

 11. A dairy needs 250 ml of milk to make one cup of curd. How many cups can be made from 10 litres of milk?

 12. A milk tanker carries 5,000 l. It delivers 1,800 l to Shop A, 1,250 l to Shop B, and the rest to Shop C. How much does Shop C receive?

-
13. A farmer collects 45 l of milk daily for 7 days. Find the total milk collected in the week.
14. A jug holds 2 l 300 ml of milk. If 850 ml is poured out, how much remains?
15. 6 bottles each hold 750 ml of milk. Find the total amount of milk in all bottles, in litres.
16. A dairy farm produces 850 l of milk a day. It uses $\frac{1}{5}$ of the milk to make paneer and ghee, and sells the rest as liquid milk. How many litres are sold as liquid milk?
17. A milk vendor has three cans: 18 l 500 ml, 22 l 750 ml, and 15 l 800 ml. He wants to pour all the milk into one drum of capacity 60 l. Will it all fit? Show your working.
18. A buffalo gives 2 litres more milk per day than a cow that gives 7 l 500 ml. If there are 4 buffaloes and 6 cows, find the total milk produced by all animals in a day.

19. How much milk does your family use in a day for tea, cooking and drinking? Estimate in litres or ml and write it down.
20. A milk packet costs Rs. 28 for 500 ml. If your family buys 2 litres of milk every day, how much do they spend on milk in a week?

Reflection Question: Why do you think milk is sold in different sized packets (200 ml, 500 ml, 1 litre)? Think of one reason.

Real-Life Application Question: Look at a milk packet, juice box or water bottle at home and write down its capacity as printed on the label.
