

Chapter 1: We the Travellers - I

Worksheet 1: We the Travellers - I

Learning Objective: Read, write, compare and order large numbers (up to 6 digits) using real travel contexts such as distances, fares and population.

Worked Example:

A train travels from Mumbai to Delhi, a distance of 1,384 km. Another train travels from Chennai to Kolkata, a distance of 1,659 km. Which journey is longer, and by how much?

Solution: Compare 1,659 and 1,384. Since 1,659 has a bigger digit in the hundreds place, it is the larger number. Difference = $1,659 - 1,384 = 275$ km. So the Chennai–Kolkata journey is longer by 275 km.

Questions (1–20)

1. Write the number 45,678 in words.
2. Write “Sixty-two thousand four hundred nine” in figures.
3. What is the place value of 7 in 47,256?
4. Arrange these numbers in ascending order: 5421, 5214, 5241, 5412.
5. Which is bigger: 38,902 or 38,290?
6. The distance from Pune to Bengaluru is 842 km and from Bengaluru to Chennai is 346 km. Find the total distance for the journey Pune → Bengaluru → Chennai.

-
7. A bus ticket costs Rs. 485. If 100 tickets are sold, how much money is collected in total?

 8. Round off 6,738 to the nearest hundred.

 9. The population of a village is 23,540. Round this number to the nearest thousand.

 10. Write the smallest 5-digit number using the digits 3, 0, 7, 1, 9 without repeating any digit.

 11. A train has 1,250 passengers and an aeroplane carries 180 passengers. How many more passengers can the train carry than the aeroplane?

 12. Find the difference between the largest and smallest 4-digit numbers that can be formed using the digits 4, 8, 1, 6 (no repetition).

 13. Write the expanded form of 30,706.

-
14. Compare using $>$, $<$ or $=$: 91,432 _____ 91,423.
15. A car's odometer reads 45,678 km. After a trip of 235 km, what will it read?
16. A railway station sold 14,562 tickets on Monday and 16,089 tickets on Tuesday. On Wednesday, the number of tickets sold was equal to (the sum of the digits of Tuesday's sales) $\times$ 1,000, plus 200. How many tickets were sold on Wednesday?
17. The number of people who visited a fair on three days were 8,453, 9,267 and 7,890. Round each to the nearest thousand to estimate the total attendance, then find the actual total. Compare the two answers.
18. A number, when rounded to the nearest hundred, gives 5,600. What is the smallest and the largest number that could round to 5,600?
19. A railway booking counter sold tickets worth Rs. 56,789 in the morning and Rs. 38,214 in the evening. How much money was collected in total that day?

20. A national highway under construction is 3,45,670 metres long. Express this length in kilometres and metres ($1 \text{ km} = 1,000 \text{ m}$).

Reflection Question: Think of one large number you saw or heard today (a price, a distance, a phone number). Write it down and say what it tells you.

Real-Life Application Question: Ask a family member about the distance (in km) of the farthest place they have ever travelled to. Write the number in words.
