

Chapter 2: Fractions

Worksheet 2: Fractions

Learning Objective: Identify, represent, compare, and perform simple addition and subtraction of fractions with like denominators in everyday contexts.

Worked Example:

A pizza is cut into 8 equal slices. Priya eats 3 slices and her brother eats 2 slices. What fraction of the pizza did they eat together?

Solution: Priya ate $\frac{3}{8}$ and her brother ate $\frac{2}{8}$. Together they ate $\frac{3}{8} + \frac{2}{8} = \frac{5}{8}$ of the pizza.

Questions (1–20)

1. What fraction of these letters are vowels: A, B, C, D, E?
2. Write the fraction representing 3 shaded parts out of 7 equal parts.
3. Which is bigger: $\frac{3}{5}$ or $\frac{2}{5}$?
4. Write the fraction “five-ninths” in figures.
5. What are the numerator and denominator of $\frac{7}{12}$?
6. A chocolate bar has 10 equal pieces. Aman ate 4 pieces. What fraction of the bar is left?

-
7. In a class of 30 students, 12 are girls. What fraction of the class is girls? Reduce to simplest form.
8. Mother bought a watermelon and cut it into 6 equal pieces. She gave 2 pieces to neighbours. What fraction remains for the family?
9. Add: $\frac{2}{9} + \frac{4}{9} = ?$
10. Subtract: $\frac{7}{10} - \frac{3}{10} = ?$
11. A ribbon is cut into 12 equal parts. Sonal uses $\frac{5}{12}$ for a craft project and $\frac{3}{12}$ for gift wrapping. What fraction has she used in total? What fraction remains?
12. Find an equivalent fraction of $\frac{2}{3}$ with denominator 9.
13. Reduce $\frac{8}{12}$ to its simplest form.

-
14. Arrange in ascending order: $\frac{1}{4}, \frac{3}{4}, \frac{1}{2}$.
15. Write three fractions equivalent to $\frac{1}{2}$.
16. A farmer divides his field into 8 equal parts. He plants wheat on 3 parts, rice on 2 parts and leaves the rest for vegetables. What fraction of the field is used for vegetables?
17. Two friends share a packet of 15 toffees. Reena gets $\frac{1}{3}$ of the toffees and Kiran gets $\frac{2}{5}$. How many toffees does each get, and how many are left?
18. If $\frac{3}{4}$ of a class of 40 students play cricket, how many students play cricket? How many do not?
19. During Diwali, a sweet shop sells 60 boxes of sweets. $\frac{2}{5}$ of the boxes are sold before noon. How many boxes were sold before noon? How many remain for the afternoon?
20. A mother divides a packet of 24 biscuits equally among her 3 children. What fraction of the packet does each child get, and how many biscuits is that?

Reflection Question: Think of one situation today where you used or saw a fraction (sharing food, dividing time, etc.). Write it down in your own words.

Real-Life Application Question: Find a fruit or vegetable in your kitchen that can be cut into equal parts. Imagine cutting it into 4 equal parts and write what fraction one piece represents.
