

Chapter 3: A Peek Beyond the Point

Worksheet 3: A Peek Beyond the Point

Learning Objective: Understand decimal place value (tenths, hundredths, thousandths), convert between fractions and decimals, order decimals, and apply them to measurement and money.

Worked Example:

Convert $\frac{3}{4}$ to a decimal, and write 0.6 as a fraction in simplest form.

Solution: $\frac{3}{4} = 3 \div 4 = 0.75$. And $0.6 = \frac{6}{10} = \frac{3}{5}$.

Questions (1–20)

1. Write 0.45 in place-value (words) terms.
2. Convert $\frac{7}{10}$ to a decimal.
3. Convert 0.125 to a fraction in simplest form.
4. Round 5.678 to two decimal places.
5. Which is bigger: 0.7 or 0.65?
6. Add: $3.45 + 2.78$.

-
7. Subtract: $9.2 - 4.65$.
 8. Convert $\frac{9}{20}$ to a decimal.
 9. A ribbon measures 2.35 m. Express this length in cm.
 10. Order in ascending order: 0.45, 0.405, 0.5, 0.045.
 11. Multiply: 3.2×1.5 .
 12. Divide: $6.4 \div 0.8$.
 13. A pen costs Rs. 12.50 and a notebook costs Rs. 35.75. Find the total cost.
 14. Convert $\frac{13}{8}$ to a decimal.

-
15. A recipe needs 2.5 kg flour, but you have a 1.75 kg bag. How much more flour is needed?
16. A car uses 6.8 litres of fuel per 100 km. How many litres will it use to travel 250 km?
17. Three friends share a bill of Rs. 487.50 equally. How much does each pay?
18. Explain why $\frac{1}{3}$ cannot be written exactly as a terminating decimal, and give its decimal approximation to 2 places.
19. Look at a price tag or grocery bill with decimal amounts (rupees and paise). Write down two prices and add them.
20. Measure your height in metres with a decimal (e.g., 1.42 m) and compare it with a friend's height. Find the difference.

Reflection Question: Why do you think money and measurements often use decimals instead of fractions? Write your idea.

Real-Life Application Question: Find a fuel price or a weight reading on a packaged item that uses decimals. Write it down and explain what it means.
