

Chapter 1: Large Numbers Around Us

Worksheet 1: Large Numbers Around Us

Learning Objective: Read, write, compare and round large numbers in the Indian and International numbering systems, and apply them to real-world data such as population and distances.

Worked Example:

A city's population is 24,68,532. Round this number to the nearest lakh.

Solution: Look at the part after the lakhs place: 68,532. Since this is more than 50,000, round up. So 24,68,532 rounds to 25,00,000.

Questions (1–20)

1. Write 7,84,32,156 in words using the Indian place-value system.
2. What is the international name for “crore”?
3. Round 4,56,789 to the nearest ten thousand.
4. Write “thirty-two lakh forty thousand six” in figures.
5. Compare using $>$, $<$ or $=$: 12,34,567 _____ 12,43,567.
6. The population of a town is 8,45,210. Round this to the nearest thousand.

-
7. Express 4,500,000 (international system) in the Indian system.

 8. The distance from Earth to the Moon is about 3,84,400 km. Round this to the nearest ten thousand km.

 9. Write the smallest 7-digit number using the digits 3, 0, 8, 5, 1, 9, 6 without repetition.

 10. Find the difference between the largest and smallest 6-digit numbers formed using 4, 7, 2, 9, 0, 5 (no repetition).

 11. Write 12,45,67,890 in words, and find the place value of the digit 6 in it.

 12. Convert 25 million into the Indian numbering system.

 13. Two cities have populations 34,56,789 and 34,65,789. Which is larger, and by how much?

-
14. Round 78,49,999 to the nearest lakh.

 15. Arrange in descending order: 9,87,654; 9,78,654; 9,86,754; 9,76,845.

 16. A football stadium holds 60,000 spectators. If 1,200 such stadiums were filled, find the total number of spectators and express it in the Indian place-value system.

 17. A government allocates Rs. 9,80,00,000 for a scheme, to be divided equally among 25 districts. Round the budget to the nearest crore first, then estimate how much each district would receive.

 18. India's population is about 1,40,00,00,000 and China's is about 1,41,00,00,000. By how many people is China's population greater? Express the answer in crores.

 19. Find the population of your city, town or state (ask at home or recall from your Social Science book) and write it in both word form and figures.

 20. Find (or recall) the road distance from your city to Delhi, in kilometres, and round it to the nearest hundred km.

Reflection Question: Why do you think different countries use different systems (Indian vs International) to group the digits of large numbers? Write your idea.

Real-Life Application Question: Find one large number in a newspaper, app or textbook today (a population, budget or distance) and write down what it represents and the place value of its leftmost digit.
